

I truly love the fact that XM has begun to offer traffic and weather for regions that i frequent. When I have the xm satellite in use, I do not use the regular fm and am signals... Therefore by having these valuable tools offered to me when I travel, I do not have to search for new stations. I can keep listening to what i know, when i want to. After all, it's not free I am paying for it just as i do for my tv.

Thank you kindly,

Jaime Weinstein an XM convert for life!
